SUMMARY

Computer Science undergraduate with hands-on experience in Java, MERN Stack, RESTful APIs, Data Structures & Algorithms, and full-stack web development. Built AI-powered applications, backend systems, and optimization platforms using modern technologies. Strong foundation in software engineering, database systems, object-oriented programming, and scalable application development.

EDUCATION

Amrita Vishwa Vidyapeetham

Bachelor of Technology in Computer Science and Engineering

Bengaluru, India

2022 – 2026

EXPERIENCE

Full Stack Developer Intern – Trajectory Minds Software Solutions

Sep 2026 – Present

Python, GCP, Docker, Firebase, Git/GitHub, Asana, Google Run, Google Build

[Offer Letter](#)

- Developed and deployed full-stack features using FastAPI, React.js, Python, and Google Cloud Platform.
- Integrated Google Sheets and Firebase Firestore with secure service-account authentication and access controls.
- Containerized and deployed applications using Docker, Cloud Build, Artifact Registry, and Cloud Run.

Internship – India Space Lab

May 2026 – June 2026

React.js, Node.js, Express.js, JavaScript, Python

[Completion Letter](#)

- Developed an ISRO-inspired CanSat Ground Control application using React.js, JavaScript, and Three.js.
- Implemented telemetry visualization and autonomous navigation features using Leaflet.js and Chart.js.

PROJECTS

AI-Powered Dental Diagnosis and Appointment Management System

Oct 2025

React.js, Node.js, Express.js, MongoDB

[Live Demo](#) — [GitHub](#)

- Developed an intelligent healthcare platform for dental symptom assessment and appointment management.
- Designed and implemented API-driven workflows for patient registration, scheduling, and symptom analysis.
- Integrated an AI-powered chatbot to provide preliminary dental guidance and enhance user engagement.

SketchForce AI – Forensic Suspect Identification System

May 2026

Java, JavaFX, OpenCV, AWS Rekognition, AWS S3

[GitHub](#)

- Developed a forensic identification platform to assist in suspect matching and investigation workflows.
- Implemented secure authentication, OTP verification, and role-based access control for authorized users.
- Automated facial comparison and evidence management workflows to reduce manual investigation effort.

TECHNICAL SKILLS

- **Programming Languages:** Java, JavaScript (ES6+), TypeScript, Python, C, C++
- **Frontend Development:** React.js, HTML5, CSS3
- **Backend Development:** Node.js, Express.js, FastAPI, RESTful APIs, JWT Authentication
- **Databases:** MongoDB, SQL, PostgreSQL, Firebase Firestore
- **Cloud & DevOps:** GCP, AWS, Docker, Cloud Run, Cloud Build, Cloud Storage, Trigger
- **Tools & Platforms:** Git, GitHub, VS Code, Postman, Linux, Vercel

PUBLICATIONS

- **AI-Powered Dental Diagnosis and Appointment System:** ICIRSET 2025 [Certificate](#)
- **Real-Time Web Chat Application with Live Performance Metrics:** ICCCNT 2025 [Certificate](#)

CERTIFICATES

- **Ultimate Web Development Course 2026 - Build Modern Websites:** MERN Stack [Udemy](#)
- **Claude Code 101:** AI-Assisted Development Workflow [Anthropic](#)
- **Oracle OCI Generative AI Professional:** Fundamentals of Generative AI [Oracle](#)
